

IMPORTANT NOTICE - CHEQUE REPLACEMENT

In line with Bank Negara Malaysia's implementation of the Cheque Truncation & Conversion System (CTCS) on **13 June 2008**, the Bank had commenced issuing CTCS compliant cheques to all our Current Account customers effective 1 October 2007.

Please take note that **non-CTCS compliant cheques** issued by customers **will not be accepted after 1 September 2009**. To prevent your non-CTCS compliant cheques from being rejected, it would be in your best interest to replace any unused non-CTCS cheques with the new CTCS compliant cheques.

For your information, the distinguishing feature of **PBB's CTCS compliant cheque** is the cheque size (7" x 3.5") and the "**Check Digit**" in the form of "**00**" that appears before the six (6) digit cheque Serial Number, as highlighted in the CTCS compliant cheque sample below.

We seek your co-operation to replace your unused non-CTCS cheques with the CTCS compliant cheques **immediately**.

Should you require further clarification, please contact your Account Holding Branch.

Thank you.
